

### **Students satisfaction survey on institutional performance**

IQAC every year conducts student satisfaction survey on overall institutional performance, whatever activities are happening every second in this college campus, either these are satisfactory or not. All the information regarding student satisfaction about the activities are taken by IQAC through questionnaires. In the questionnaires we generally ask the questions like –

– Are you satisfied or not by taking admission to this college?

How do you feel about the level of teaching here?

How is the facility of library here?

What are the condition of washroom and drinking water?

What are the management of NCC, NSS, Sports and Red cross in this college?

Is there any suggestion would you like to give?

The above mentioned questionnaires we put before students for getting the real picture of college and its activities. Through these questionnaires we get the outcomes of our classroom teaching and outside community social services.

We also pay attention towards the result of annual & semester exams. Through result we come to this point how our teaching is effective for the benefits of the students. If we get positive results we come to this conclusion that teaching is running on the right track.

In this way student satisfaction survey has been done by IQAC every year to know the real outcome of the education that is imparting in this campus round the year.
